Abstract of JP2285759

PURPOSE:To connect a caller communication terminal equipment and a called communication terminal equipment with a line exchange by allowing a center equipment to send information of a terminal equipment corresponding to a possessor identification number to the line exchange based on the content of a reference table. **CONSTITUTION:**When a user moves while carrying portable communication terminal equipments 81-8N, portable communication terminal equipment connection terminals 71-7N connect to moving destination communication terminal equipment connection terminals 61-6N, and the user applies dialing for transfer registration or selects a function button according to the service menu displayed on equipments 81-8N to apply transfer registration and the possessor identification number is sent to a line exchange 4 and to a center equipment 5. Then the equipment 5 indexes the communication terminal equipment connection terminal position represented by the possessor identification number to the possessor identification number reference table and sends the number corresponding to the possessor identification number to the equipment 4. Then the equipment 4 connects the caller and called party based on the data.
